## ROBO-MARKER G2 MAKES A WORLD OF DIFFERENCE

# ROBO MARKER G2

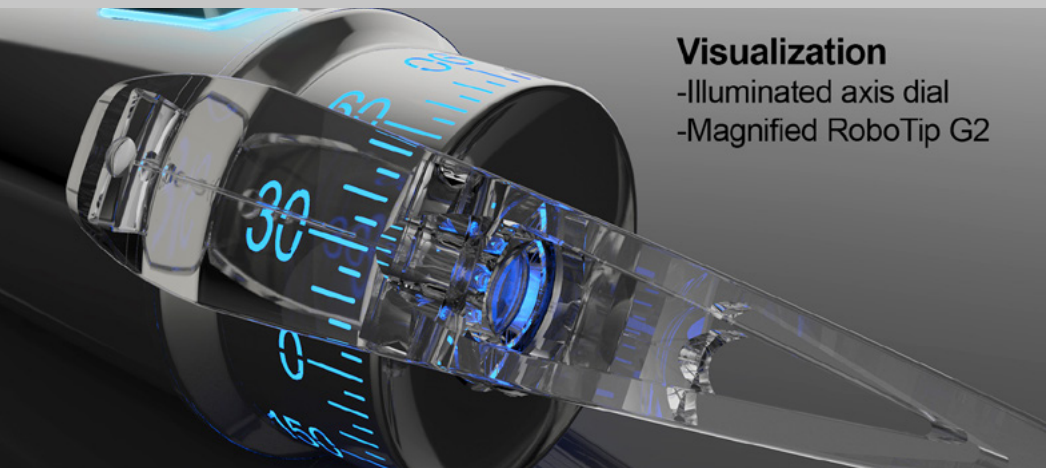

## Versatility and Safety

- Dual position RoboTips (scleral or corneal)
- Preformulated RoboTips for multi spectrum visibility
- Sterile, single use RoboTips – no TASS

## Visualization

- Illuminated axis dial
- Magnified RoboTip G2

## Efficient

- No wait, no autoclave
- Long lasting marks (2+ hours), mark multiple patients in pre-op
- Single step marking to desired axis eliminates secondary OR marking
- Eliminate return to pre-op between cases

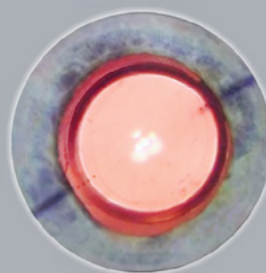

## Cost Effective

- Eliminate multiple instruments: markers, axis rings, digital alignments
- No space requirements. No setup or maintenance fees.
- Low capital expense. Low cost per case.

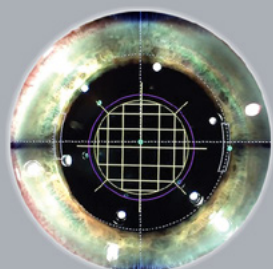

## Used for Toric IOL Placement

The RoboMarker G2's dry formula lasts up to 2 hours and maintains clear, crisp lines. No autoclave wait and single step marking means a more efficient surgical day.

## Used for Femtosecond Alignment

Premium results depend upon accurate marks. The RoboMarker G2's self-leveling high precision, ball bearing based pendular mechanism ensures that your Femtosecond Laser is aligned properly for optimal surgical marks.

## PRECISION

### Laser Assisted Targeting

- Gyroscopic system for proper mark placement
- Adjustable brightness class 1 eye safe laser
- Includes patient fixation dot

### Ease of Use and Confidence

- Self Leveling design
- Brake button; prevents rotation
- 20% Larger for better ergonomics

Better Alignment.  
Better Outcomes.
